

AIMS & OBJECTIVES

To experience and familiarise the various positions available to perform minimally invasive resections. To be familiar with the instruments and equipment required.

To practise the appropriate and methodical approach to laparoscopic and thoracoscopic dissection and mobilisation in a safe manner.

To demonstrate the different surgical techniques in a hands on theatre setting.

How to avoid and deal with intraoperative complications

To experience the different exposures to the abdomen and chest in relation to the open approach. To learn and practice various intraoperative anastomotic techniques.

COURSE CONTENT

- Gastric Mobilisation for Oesophagectomy
- Laparoscopic Gastric Mobilisation
- Gastrectomy
- Abdominal Lymphadenectomy
- Endosurgery products and techniques
- Thoracic phase oesophagectomy
- Thoracic Dissection
- Neck dissection for Stage 3 oesophagectomy

TARGET AUDIENCE (ST5-ST8/CONSULTANT)

An intensive two day course with an expert faculty. A series of didactic lectures and edited videos provides step by step tuition for the use of minimally invasive techniques in the resection of upper gastrointestinal cancers. Followed by intensive hands on surgical dissection using fresh frozen cadavers includes: laparoscopic gastric mobilisation, thoracoscopic oesophagostomy open cervical exploration and anastomosis, the use of hand ports and laparoscopic subtotal gastrectomy. This course is conducted by a faculty of experienced surgeons. The course is suitable for consultants and senior trainees.

The Newcastle Surgical Training Centre, Freeman Hospital has an international reputation as a centre of excellence. Delegates will have the opportunity to undertake laparoscopic procedures in fresh frozen human cadavers under the guidance of a faculty of skilled surgeons

FACULTY

Professor M .Griffin- Consultant Surgeon
Mr Arul Immanuel – Consultant Surgeon
Mr Kamil Wynne- Consultant Surgeon
Mr Alex Phillips- Consultant Surgeon
Mr Shajahan Wahed- Consultant Surgeon
Additional Faculty to confirm
