SYMPOSIUM ON HEPATOBIILIARY AND PANCREATIC MALIGNANCY IN THE ELDERLY 2019 9-10 December | Hilton Deansgate Manchester

The Manchester Foundation Trust, University of Manchester and The Christie Foundation Trust invite you to the Symposium on Hepatobiliary and Pancreatic Malignancy in the Elderly at the Hilton Deansgate in Manchester on the 9-10 December 2019.

The number of patients with HPB cancers attending new and follow-up clinics is increasing with 2 out of 3 patients aged greater than 60 years, and 1 in 3 over 80 years. This is unprecedented; the medical community, physicians, surgeons, nurses and managers are often ill-prepared on how to deal with this increasing demand.

Progress has been made on how to assess older patients; in relation to risk assessment and/or life expectancy, with the aim of improving outcomes of treatment.

Protecting the vulnerable patient from over-treatment, while making sure that

those who are fit are given appropriate access to all therapeutic options, regardless of their anagraphic age, is imperative.

Prominent UK clinicians with an interest in Geriatric Oncology are contributing to this day-and-a-half meeting, assisted by well-known international experts.

We are grateful to E-APHBA, GBIHPBA, AUGIS, ASGBI, ESSO, PCUK and BASO for encouraging us to organise this educational event, which is intended to enhance the debate, promote research and guide on new standards of care for older patients with HPB malignancies.

You are all invited to take part in the discussion and we look forward to welcoming you to Manchester.

Nicola de' Liguori Carino

Riccardo A. Audisio
